## Keeping the beat

In a manufacturing laboratory, Quality Engineering Technician Terry Martin works meticulously to produce a medical marvel: A tiny, implantable heart pump. Co-developed by Johnson Space Center's engineers and Dr. Michael DeBakey, this product of ingenuity saves lives, proving to be a huge technology transfer success. JSC's Technology Transfer and Commercialization Office (TTCO) helps bring what was once only imagined to reality. To learn more about this remarkable breakthrough and TTCO, please turn to **Page 4**.
